SUMMARY

Experienced front-end developer with nearly 3 years of expertise in crafting innovative websites for organizations. A dedicated contributor to website development, I excel in collaborative efforts on critical projects and document drafts. Proficient in key technologies such as JavaScript, React, and HTML/CSS, I'm committed to delivering outstanding web solutions.

TECHNICAL SKILLS

Language: JavaScript, HTML5, CSS3, TypeScript, SQL
Frameworks and Libraries: React, Redux, Node.js, REST, Material-UI, Tailwind CSS, Bootstrap
Miscellaneous: Git, VS Code, Firebase, Eclipse, JIRA, ServiceNow, Jest, Chrome Developer Tools, React TestingLibrary, AWS, Postman, Agile

PROFESSIONAL EXPERIENCE

Senior Systems Engineer | Infosys Ltd.   May 2021 – Present
Diageo: *Bangalore, India*
- Managed a process re-engineering project to improve and consolidate end-to-end service processes by analyzing and clarifying requirements to the client before implementation.
- Developed functional components using React JS and features like hooks and ES6 concepts with .NET core as backend.
- Used React Thunk middleware for writing action creators in the module for asynchronous tasks.
- Performed high level testing and resolved bugs raised by QA and Testing teams.
- Executed a system of reusable components, resulting in a 50 percent reduction in development time for new pages.
- Experience in CI/CD, design reviews, code reviews and unit testing in Agile Development.
- Working as L3 support after project moved into production by solving tickets on ServiceNow.
- Designed and maintained code and documentation and used Git for version control and collaboration.

AM Hive:
- Responsible for solving production ticket, maintaining test, development, and production servers.
- Worked as L3 support for client onboarding for various business users across the globe.
- Resolved the issue raised by onboarded clients by working closely with various vendors and running pre-defined scripts.

PROJECTS

Netflix Clone. / *React, Redux, JavaScript, Firebase, TMDB API*
- Programmed a 100% responsive Netflix clone website with React as front-end and made it live using Firebase
- The app retrieves 50+ movie and TV show information using the TMDB API.
- The state of the application was managed and stored using Redux, a state management library.
- Firebase was used as the backend, storing user data and authentication information.

Amazon Clone. / *React, JavaScript, Context API, Material UI, Firebase*
- Enacted React components and responsive design principles to create a visually appealing website similar to Amazon, resulting in a 50% decrease in bounce rate and a 30% increase in average session duration.
- Incorporated authentication and deployment using Firebase
- Enabled React Context API to manage the state of cart and allow real-time update of cart's contents as user adds or remove products.

NewsMonkey: News app. / *React, Bootstrap, JavaScript*
- Programmed a news app using react as a front-end allowing users to browse news articles from 5+ category such as business, sports, entertainment and health
- Fetched news article from third-party API which allows 100+ real-time news and easy integration into the app
- This app is 100% responsive which will work on all screen sizes

EDUCATION

SRM Institute of Science and Technology   Chennai, India
B.Tech- Electronics and Communication Engineering   *Aug. 2016 – June 2020*
